PROFILE

Full-Stack Developer with a **MIAGE** degree and **2 years of experience at Orange** in PHP/Laravel and Vue.js, complemented by projects in Java/Spring Boot and C#/.Net. I design tested, production-ready **REST APIs** (**Docker**, **CI/CD**) and work in an **Agile** environment. **Available** and **mobile** across France.

EXPERIENCE

Full-Stack Developer PHP/Laravel & Vue.js - apprenticeship, Orange France 09/2024 – 09/2026
Strasbourg, France

- Designed and delivered a customer satisfaction measurement module (PHP/Laravel, Vue.js, third-party API) for 60 users, replacing an untracked manual process
- Reworked business modules (invoicing, electronic signature) to simplify user journeys and speed up pages through query, index and data-loading optimization
- Progressively modernized the legacy Blade interface with Vue.js, using an "Islands Architecture" approach
- Contributed to deployment industrialization via GitLab CI/CD: tests, quality/security checks, deliverable generation and deployment through the Orange Deployment Engine and Ansible, cutting manual operations from about 1 h to under 10 min
- Fixed 30+ bugs, including critical production issues
- Oversaw the application's migration to a secure Linux host in Orange's private cloud
- Presented deliverables to business users and worked in Agile/Scrum
- Tech environment: PHP, Laravel, Vue.js, MySQL, REST API, Docker, GitLab CI/CD, Linux, Ansible, SonarQube, Checkmarx, Gitleaks, Agile/Scrum, Jira, Confluence

Python/Flask Web Developer - internship, Provençale SA 05/2024 – 08/2024
Brignoles, France

- Developed an absence planning website and a stock management interface integrated into the company ERP
- Tech environment: Python, Flask, SQLite, Bootstrap, Git

PROJECTS

With.dev 🔗, IT Recruitment Platform (Java/Spring Boot & React) 2026 – Ongoing

- Design and develop an IT recruitment platform: documented REST API (OpenAPI), multi-criteria job search, candidate profile management (DTOs via MapStruct)
- Implement data persistence with Hibernate/JPA on PostgreSQL (Supabase), with build and dependency management via Maven
- Secure the application as a stateless resource server: Supabase Auth JWTs validated via JWKS, candidate/recruiter roles, separated public/protected routes
- Structure the code in layers (API / domain / infrastructure), covered by 260+ automated tests (JUnit, Mockito, Vitest, Testing Library)
- Containerize the whole stack with Docker Compose (PostgreSQL, backend, frontend) and a GitHub Actions CI/CD pipeline: build, tests and delivery of versioned Docker images (GHCR)
- Tech environment: Java 21, Spring Boot 4, Hibernate/JPA, Maven, React, TypeScript, REST API, PostgreSQL, Docker, GitHub Actions, Supabase Auth

Achraf.Hafdi 🔗, Personal Portfolio (React) 2026

- Designed and developed a personal portfolio website showcasing my background, skills and projects
- Tech environment: React, TailwindCSS, i18n, EmailJS

SKILLS

Backend
Java (Spring Boot), PHP (Laravel), C# (.Net)

Architecture & Design
REST API, Clean Architecture, MVC, Microservices, SOLID

Frontend
React, TypeScript, Vue.js, JavaScript, HTML/CSS, Tailwind CSS

DevOps & Tools
Git, GitLab CI/CD, Docker, Ansible

Database
PostgreSQL, MySQL, SQLite

Methodology
Agile/Scrum, Jira

EDUCATION

Master's (Bac +5) in Computer Science, MIAGE track, Université de Haute-Alsace 2024 – 2026 | *Mulhouse, France*
Bachelor's in Computer Science, MIAGE track, Université de Haute-Alsace 2023 – 2024 | *Mulhouse, France*
Bachelor's in Computer Science, Information Systems track, Université Constantine 2 2020 – 2023 | *Constantine, Algeria*

CERTIFICATIONS

Introduction to Cybersecurity — Cisco Networking Academy

MISCELLANEOUS

Languages: French (Bilingual), Arabic (Native), English (B2) / **Interests**: Photography, Design, Fitness, Tennis
