PROJECTS

With.dev — IT Recruitment Platform

2026 - Ongoing

- Design and development of a recruitment platform inspired by HelloWork, covering the full candidate/recruiter lifecycle.
- Development of key features: job listing management, applications, status tracking, and advanced search.
- Secured with Keycloak (OAuth2/JWT) with role and access management.
- Hexagonal architecture with unit and integration tests.
- Tools: Java, Spring Boot, React, PostgreSQL, Keycloak, GitHub

WebApp & PHP REST API

2024

- Development of a web application and REST API in PHP without a framework, following PSR standards and a hexagonal architecture. Implemented a custom routing system, a mini ORM, and middleware.
Tools: PHP, MySQL, Composer, GitHub

C++ Platform Game

2023

- Collaborative creation of a console-based platform game in C++, built on object-oriented programming principles.
Tools: C++, UML, GitHub

SKILLS

Backend: Java (Spring Boot), C# (.NET), Python (Flask), PHP (Laravel)

Frontend: React, Vue.js, JavaScript, HTML/CSS, Tailwind CSS

Databases: MySQL, Oracle, PostgreSQL, SQLite

DevOps & Tools: Git, GitLab CI/CD, Docker, Jira

Architecture: REST API, Clean Architecture, MVC, Microservices, Agile/Scrum

MISCELLANEOUS

Languages: French (advanced), English (upper-intermediate), Arabic (native)

Interests: Photography, Design, Fitness, Tennis

Driving license: B
